**DETAILED ACTION**

**Election/Restrictions**

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, claim(s) 1-4, drawn to a method of amplification.
- Group II, claim(s) 5-8, drawn to a device.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I (claims 1-4) is directed to a method for dissociating double-stranded nucleic acids by electromagnetic radiation for the process of amplification. Claim 1 is anticipated by Mian (WO 94/29484; 22-Dec-1994). Mian demonstrates a method of amplification wherein the double stranded nucleic acid strands are separated by use of an electromagnetic field. As such the method of claim 1 lacks novelty therefore the claims do not share a novel technical feature.

A telephone call was made to Anthony Zelano on September 26, 2003 with respect to an election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
